

“Tipo” acquired “red dot design award”

Stacking chair “Tipo” launched in Orgatec 2010 acquired “red dot design award / product design 2011”. Product design field this year received 4,433 applications from 60 countries, and “Tipo” was selected from among them through severe examination by the juries of “Design Zentrum Nordrhein Westfalen.”

reddot design award winner 2011

“Tipo” is a lightweight stacking chair superior in comfort sitting offered by a mesh seat and storage while based on simple yet sophisticated form, so that “Tipo” is truly a next-generation stacking chair having both stylish design and functional beauty.

The mesh and frame are made using a patented casting method and have superior strength and durability. The development of new-era stacking chairs and the processing technology we have accumulated for steel pipe enables up to 40 chairs to be stackable onto a special dolly within a minimum height.

To reduce environmental load, the products can be separated by material when disposed of so that the all of the materials can be recycled.

After being launched in Orgatec 2010, the “Tipo” has received such a big response and a lot of inquiries in Europe that this product was introduced in a German design magazine “md”.
