

“Tipo” awarded GREEN GOOD DESIGN 2014

Aichi Co.,Ltd.(President: Michihiko Shimamoto, Headquarters: Nagoya, Japan) has received GREEN GOOD DESIGN AWARD 2014 for eco-friendly programmed stacking chair “Tipo”, following the award of GOOD DESIGN AWARD 2012*.

The European Center for Architecture Art Design and Urban Studies and The Chicago Athenaeum: Museum of Architecture and Design have joined forces on two continents to present an innovative and challenging new public program: GREEN GOOD DESIGN in 2009, as a new category of GOOD DESIGN. Only 100 sophisticated products recognized that have forwarded exceptional thinking and inspired greater progress toward a healthier and more sustainable universe.

* GOOD DESIGN

The oldest and the most prestigious Awards Program organized worldwide. Founded in Chicago in 1950 by Edgar Kaufmann, Jr., together with such pioneers in modern design as Charles and Ray Eames, Russel Wright, George Nelson, and Eero Saarinen, GOOD DESIGN honors the yearly achievements of the best industrial and graphic designers and world manufacturers for their pursuit of extraordinary design excellence.

Tipo is a light-weight, high-density stack seating with a comfortable waterfall front edge, lightweight(the mesh seat/mesh back version is 3.5kg) and stack 40 pcs high on a dolly. The chair has various interchangeable design models with mesh or plastic seat and mesh or plastic back. It meets BIFMA testing standards and ISO level 4 quality standards. Tipo sets a new recycling standard in the future industry and is also representative of environmental high technology. It is hard to imagine this brilliant chair is made of 100% recycled resin material. In the past, it has been generally accepted as impossible to produce furniture made from recycled materials in such brilliant beautiful colors, let alone pure clean white.

The mesh material creating exceptionally comfortable seats and backs is made from 100% recycled PET bottles.

All the resin parts including seat, back and glide are 100% recycled PP. All components of Tipo are recyclable and the simple construction enables easy disassembly into each material type.

Tipo is leading the innovative ecological market globally!
